

Microsoft Software Development Engineer (Medior and Senior)

Vacaturenummer

rs.msde.2013

Building Great Software:

Software Development of business and technical software in often an agile/scrum environment where the activities include Software Development, Software Specification & Design, Software Integration and Software Testing. The focus is on building great software for customers in several market segments that is robust, relevant and designed for analytics.

Responsibilities:

You are responsible for the design and development of software with Microsoft .NET technologies in an agile/scrum environment where you have considerable freedom and autonomy. You will work in small agile teams on the development of e.g. Rich Internet Clients, Web Portals, Server Software, Windows Apps or Software Integration projects using Microsoft C#.NET as the core technology. Other required technologies like e.g. ASP.NET 4 depend on the specific customer project.

Activity Highlights:

- Software Design & Development in agile teams
- Documenting for results
- Seamless integration and testing of your own work
- Planning & Tracking of your own activities
- Interest and Insight in the project, the business value and your role in it
- Continuous Project communication

Knowledge, Skills & Attitude:

- Master / Bachelor in Computer Sciences / Computer Engineering or comparable
- At least 3-5 years intensive experience with C#.NET
- Having fulfilled the role of software developer in multiple projects
- ASP.NET 4 for Web and Portal Development
- Experience with agile / scrum projects and way of working
- Knowledgeable about MVC 4, WPF / XAML, VS2010 or higher
- Knowledgeable about web technologies HTML5, CSS, Javascript & jQuery
- Sharepoint (2013), Windows 8, know-how is a clear advantage
- Winner's mentality
- Strong customer focused with good communicative skills
- Speaking Dutch and or English
- Drivers license

Regions:

Zuid-Holland, Utrecht or Noord-Brabant

What we offer:

- Excellent Primary and Secondary terms of employment
- Company car
- Microsoft Smartphone
- Training and Certification with strong focus on Analytics
- Many possibilities and focus on education and training
